Research Interest

Human-Computer Interaction – Artificial Intelligence – Machine Learning – Deep Learning

Education

Bangladesh University of Engineering and Technology (BUET) *Dhaka, Bangladesh*

Bachelor of Science in Computer Science and Engineering *Feb 2017 – May 2022*

- CGPA: 3.68/4.00
- Last two-year CGPA: 3.84/4.00

Ideal School and College *Dhaka, Bangladesh*

Higher Secondary Certificate, Science *June 2014 - August 2016*

- GPA: 5.00/5.00

Ideal School and College *Dhaka, Bangladesh*

Secondary School Certificate, Science *2004 - May, 2014*

- GPA: 5.00/5.00

Work Experience

University of Asia Pacific *Dhaka, Bangladesh*

Lecturer *Aug 2022 - Present*

- **Courses Teaching**:
  - Structured Programming (C)
  - Introduction to Computer Science and Programming Methodology Lab
  - Software Development
- **Responsibilities**:
  - Efficient planning of assignments to enhance the student's ability to understand computer basics.

BUET-Japan Institute of Disaster Prevention and Urban Safety *Dhaka, Bangladesh*

Research Assistant

Supervisor: Dr. Mohammed Eunus Ali (BUET) *July 2022 - Jan 2023*

- **Purpose**:
  - Improvement of Earthquake Early Warning System using graph attention networks.
  - Prediction of earthquake intensity in different regions using a relatively small amount of earthquake receiver station records.

Bangladesh University of Textiles *Dhaka, Bangladesh*

Lecturer (Part-time) *June 2022 - July 2022*

- **Courses Teaching**:
  - Structured Programming (C)
- **Responsibilities**:
  - Effective delivery of course contents to make the student's able to understand C basics.

Research Projects

Automated Analysis of Parkinson's Disease (PD) Characteristics and Severity Based on Videos Collected via a Web-based Platform (B.Sc. Thesis) **(**PDF**)** *2021 - 2022*

Supervisor: Dr. Mohammad Saifur Rahman (BUET)

External Collaborators: Dr. Ehsan Hoque (University of Rochester, US), Dr. Imran Sarker (NINH, BD)

- Building a simple automated online PD screening tool by modifying an existing web-based application that can capture audio and video data from participants to identify Parkinson's Disease (PD) in thousands of undiagnosed people in Bangladesh.
- Providing patients the opportunity for frequent assessment/monitoring without having appointments with neurologists or requiring them to travel to a healthcare facility.
- Contributing to the ongoing study to improve the condition of the 10 million people worldwide who currently have Parkinson's disease.

Actionable analytics of cancer *2021-Present*

Supervisor: Dr. Mohammad Saifur Rahman (BUET)

External Collaborator: Dr. Abu Zafer Mohammed Dayem Ullah (Barts Cancer Institute, UK)

- Identifying the association of various clinical or molecular factors with the survival of patients diagnosed with cancers.
- Developing a gene mutation-based scoring system for categorizing patients according to their survival potential using machine learning techniques.

Notable Projects

WBC classification

Deep Learning Project *2022*

- Through this project white blood cells are classified into four subtypes from the image data of blood cells.
- Framework : Keras
- Github link

CNN from Scratch

Deep Learning Project *2022*

- Implemented a convolutional neural network from scratch for an image classification task.
- Language: Python
- Github link

DNS cache poisoning

Network Security Project *2021*

- An attacker can poison the DNS cache and direct users to a false website in order to gain personal information which will be a phishing attack.
- Language: C, Tool: VirtualBox VM, WireShark
- Github link

SHIKHON - The Admission Helper

Software Development Project *2021*

- The targeted users of the platform is University Admission Candidates and the purpose of the application is to provide tutorials, notes, and solutions about a particular topic of a particular subject. The main challenge of this project is to learn how to build an interactive live application.
- Language : Javascript, Library : NodeJS, Database : MongoDB, Frontend : React Native JS
- Github link

Lines Of Action (LOA)

Artificial Intelligence Project *2021*

- This project provides a platform where the player can play with an AI agent or two players can play with each other.
- Language: Java, Framework: Slick
- Github link

Skills

Programming	Python, R, C/C++, Java, javascript, BashScript, HTML, CSS, AWK, TCL
Database	PostgreSQL, MongoDB
Frameworks	Keras, PyTorch, Node.js, React.js, React-native, Bootstrap, Javafx, Slick, OpenGL
Tools/Software	Git, Microsoft Word, PowerPoint, Excel, Figma, MATLAB, Latex, Adobe XD (UI/UX Design), Wireshark, Cisco Packet Tracer
Libraries	Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, TensorFlow, OpenFace

English Proficiency

TOEFL Reading: 26, Listening: 26, Speaking: 22, Writing: 27

Achievements

2022 **FE Certificate,** Fundamental IT Engineer (FE) level-2 Examination (passed both shifts) *Bangladesh*

2009-2021 **Merit Scholarship,** Primary School, Junior School, Secondary School, and Higher Secondary Certificate *Dhaka Board*
